your ERP

You see

system keeping your business processes on track.

Integrating customer information from call center to loading dock. Tracking HR data between global business units. Standardizing manufacturing processes between plants. And letting you give the CFO an undisputed "single version of the truth."

So what do you feed ERP systems to keep them smokin'? Satisfy their appetite for power and performance with HP-UX11i and the latest HP 9000 and HP Integrity system.

You'll see

You see Oracle, PeopleSoft, SAP, Lawson – you've come to depend on these and other ERP applications to run your business.

And you've come to depend on the fact that ERP technology is advancing—that these applications are always being improved. Which means their appetite for hardware and operating system software is voracious.

You'll see that that's where HP comes in. We constantly improve HP-UX 11i and our server technology to give you the horsepower and technological improvements to get the maximum impact from whatever upgrades your ERP applications make. Improvements like 10 times the performance in the same footprint. Improvements that increase capacity and still let you consolidate on 70% fewer servers.

With a well-fed ERP system you can make your products more quickly and efficiently, analyze your data faster, make your decisions more quickly — oh, and while you're at it, you can put a big smile on your CFO's face.

See how these customers use HP to harness the appetite of their ERP systems: **Download these free white papers and see for yourself:**

- » Volvo – saw a reliable, scalable platform for future growth.
- » Saint Gobain Solaglas – saw lower cost of ownership.
- » General Mills – saw shrinking third-party software costs.
- » KONE - saw an average response time of 1.2 seconds, well below the target figure.
- » Chevron/Texaco – saw a two-fold performance improvement over our previous systems.
- » HP Integrity SAP ERP (PDF, 479 KB)
- » Evolving your HP-UX 11i Environment from HP 9000 to HP Integrity (PDF, 401 KB)
- » Business process management and the Adaptive Enterprise (PDF, 78 KB)
